

Access Scope Standard

GAZ-2026-03 | acting-user authorization gates

Acting user rule

Every request is evaluated as the acting user. A user from another workspace has no access to material that was never shared with them, even when a cached citation is visible.

Removed share

When a material share is removed, new retrieval cannot use that material for the acting user; an existing canvas keeps only its visible citation label.

Cross-owner rule

A user cannot read another owner's private material by naming its identifier. Ownership is checked before evidence enters the prompt.

跨空间规则

其他空间的用户无权访问未共享资料；缓存引用或旧截图不扩大当前用户的访问范围。授权在证据进入上下文之前检查。

Standard id

The access scope standard identifier is GAZ-2026-03.
