

Release Policy Register

GRP-2026-01 | versioned values for pin/default gates

Version rule

A canvas that already cites version V1 stays pinned to V1 when reopened. A new request uses the latest ready version unless the user explicitly selects an older one. The register identifier is GRP-2026-01.

V1 values

In version V1 the evidence retention period is 30 days, the final approval role is Release Manager, and the manual-review score is 85.

Missing version

Version V3 does not exist. A request pinned to a missing version must report that the version is unavailable rather than silently using the latest one.

版本冲突

V1 与 V2 的保留期不同：V1 为 30 天，V2 为 45 天。已固定 V1 的图形不得因为 V2 存在而改写为 45 天。
