

Access Scope Cases C

GAZ3-2026-15 | prompt-boundary gates

Prompt boundary

Authorization is checked before evidence enters the prompt; an unauthorized item never reaches the model. Id GAZ3-2026-15.

Shared read only

A read-only share grants retrieval but not editing or re-sharing of that material.

Owner revoke

An owner may revoke a share at any time; revocation blocks new retrieval immediately.

引用泄漏

回答中不得出现无权用户不可访问资料的内容,即使该内容在缓存中。

Audit trail

Every authorization decision is recorded with the acting user and the evaluated scope.

Access Scope Cases D

delegation and boundaries

Delegation

A delegated editor acts within the delegator's scope and cannot exceed it.

Service account

A service account request is still evaluated against a concrete acting-user scope, never as a superuser.

空间隔离

不同空间之间默认完全隔离;跨空间访问必须有显式共享。

Stale token

A stale session token does not extend access beyond the current authorization state.

Copy out

Exporting a diagram does not copy protected material to users who cannot access it.
