

Chartbook Narrowing A

GCB-2026-06 | mounted-only retrieval

Mounted only

Inside a chartbook, drawing may use only the material mounted to that chartbook. The standard id is GCB-2026-06.

No library reach

A chartbook request must not reach the user's other, unmounted library material, even though it belongs to the same user.

收窄不扩大

图册是收窄范围而不是扩大;图册内检索绝不触达图册外资料。

Unmounted miss

If the answer exists only in unmounted library material, the chartbook request reports insufficient evidence rather than using it.

Explicit still bounded

Even an explicit source selection inside a chartbook is bounded to what is mounted to that chartbook.

Chartbook Narrowing B

mount changes and non-chartbook

Unmount

Unmounting a material immediately removes it from that chartbook's retrieval scope for new requests.

挂载新增

新挂载资料后才进入该图册的检索范围;挂载前的请求不得使用它。

Non-chartbook

A non-chartbook drawing may search the user's full library, but still only that user's own material.

Two chartbooks

Material mounted to chartbook A is not retrievable from chartbook B unless also mounted there.

Leak is defect

A chartbook request that retrieves unmounted material is a scope-narrowing defect, even when same-user.
