

Version Cases

GVR2-2026-08 | pin/default/missing

Pinned reopen

A shape citing version V1 stays pinned to V1 when reopened. The id is GVR2-2026-08.

New default

A new request without an explicit version defaults to the latest ready version.

Missing pin

A request pinned to a nonexistent version must report the version unavailable, not silently use latest.

冲突

同一资料多版本数值冲突时,回答锁定被引用版本,不能把新版本数值套用到已固定旧版本的图形。

Explicit older

A user may explicitly select an older ready version; the agent then uses that version, not latest.

迁移

只有用户显式迁移后,已固定图形才改用新版本。
